RANDALL DYER & ASSOCIATES, is a small, privately held corporation located near Knoxville, Tennessee, specializing in the high quality construction of electric-actuated pipe organs.

Our first instrument, built in 1967 for a local college, is still in use today, and is joined by nearly 100 more, in fourteen eastern states. In the intervening 40 years, we have established our reputation by offering our clients well-conceived organs at reasonable cost. With particular emphasis on church service playing, our instruments are known for their unusually well-blended full, rich, and cohesive sound - a sound which compels congregations to sing heartily, without obliterating them.

With the exception of pipes and electrical gear, the parts of all our organs, including our Blackinton-style slider-and-pallet chests, our consoles, wind systems, framing and casework, are all made in house. We believe this is the only way to ensure the strict quality control we want over the end product.

Pipework, custom-made to our exacting specifications by a small, select group of pipe-makers with whom we have worked for more than 25 years, is scaled and voiced here for the specific installation under the supervision of our Tonal Director, Bradley E. Jones.

EACH INSTRUMENT IS FULLY ASSEMBLED and tested prior to shipping, and on-site installation and tonal regulation are done by the same personnel who built the organ in our shop, under the personal supervision of Randall Dyer. Upon completion, each organ carries a 10-year Warranty against defects in materials and workmanship, and we further ensure our clients' complete satisfaction, by making our Service Department available for follow-up tuning and maintenance.

We believe the finest organ building in America today is being done in small shops such as ours, and we urge you to talk with our past clients about our dealings with them. We would be pleased to talk with you about an organ custom-designed and built to meet your musical and budgetary requirements, in any size from 2 ranks to 70 or more.

CHURCH STREET UNITED METHODIST CHURCH

Main organ, IV Manuals, 82 Ranks
<<

THE CURTIS INSTITUTE OF MUSIC
Philadelphia, Pennsylvania
Practice organ, II Manuals, 4 Ranks

CHURCH OF THE ADVENT
Medfield, Massachusetts
II Manuals, 14 Ranks

FIRST UNITED METHODIST CHURCH
Orlando, Florida
IV Manuals, 79 Ranks.

GIVEN THE ECONOMIC realities of the time in which we live, we welcome the opportunity to rebuild and modernize a client's existing instrument when it is of good manufacture. We retain the best pipework, revoiced as required, supplying additional new ranks to fill out the stoplist. Mechanical systems are rebuilt or replaced, and new consoles with state-of-the-art technology are provided.

The results are outstanding organs which maintain the essence of the original instrument while going beyond the original builders' intent to speak with the character of a new organ, ready to meet their owners' needs in the 21st century

Randall Dyer
